

# TRANSACTION SOLUTIONS

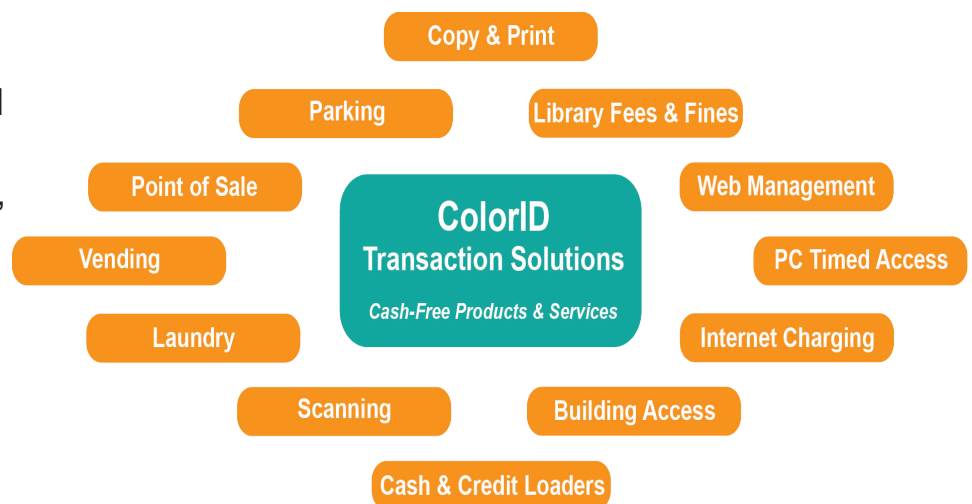

CASH-FREE CAMPUS

## FEATURES:

- Fully Customizable
- Open System
- Multiple Card Technologies  
(Proximity, iClass, Mifare, Mag Stripe, etc)
- Easy Database Connectivity
- Pin-Pad Protected Purchases

## ColorID Higher Education Transaction Management Solution

Universities, technical institutes and community colleges are automating millions of transactions on campuses for greater reporting, reduced costs and freedom from cash handling. ColorID's Transaction Management Solution allows students to pay for services and purchases on and off campus from the value in their accounts, using their ID cards, user names and/or PINs. University staff can allocate print, copy and other expenses to departmental accounts.

Kiosk Stations

### A campus account does it all...

- Works with any type of card – Mag Stripe, Bar Code, Proximity, iCLASS, MIFARE, DESFire
- Available as a whole system or individual modules
- Does not rely on proprietary technology
- Can link to existing systems
- Web browser access to accounts for students and parents
- Web browser access to administrative functions and reporting
- Scalable - start with one module (e.g. Copy/Print) and add more later
- Robust database management and reporting features
- Secure – all value stored on the server, not on the card.

# TRANSACTION SOLUTIONS FOR HIGHER EDUCATION

## A campus account for everyone can...

- Printing: PC pop-up, follow-me printing, print release station for secure printing, embedded in printer
- Laundry
- Vending
- Point of sale
- Off-campus merchants
- Parking
- Cash load stations
- Access a bank debit account for purchases on campus, off campus and on-line
- Track attendance
- Allocate office costs for document and scan, couriers, telephone and applying quota
- Track full range of office costs – scan, print, fax, copy, calls, internet
- Secure print release using staff card for confidentiality and less print duplication
- Printing and copying at the library
- Charge and allow for secure release of photocopying and printing
- Reserve and pay for PC time in libraries, computer labs or campus housing

## Use existing systems, existing devices, and existing cards...

ColorID Transaction Management software integrates seamlessly with most campus student information, financial, library and data networks for building access, tuition and fines. Any type of card – magnetic stripe, HID, iCLASS, MiFare, proximity or barcode – can be used to access an account held on the system. The system can interface with existing copiers, new embedded multi-function printers and door security, using our Transaction Management terminals and card readers. The Transaction Management Hardware will support campus accounts with re-load kiosks using cash, credit or bank accounts, terminals for print or point of sale and PC access and reservation stations.

## ColorID Transaction Management System offers...

- Full on-line reporting for all transactions according to user, device or cost center
- Increased security with less cash and less staff involvement
- User friendly technology with remote diagnostics
- Full system integration for seamless transfer of student details
