

ColorID's Re-Carding Service allows your institution to outsource your entire Re-Carding event to ColorID.

Many schools have state of the art campus carding centers that can manage the day to day traffic of new card production; however, when the entire campus or institution needs to be recarded the extra strain this puts on the campus resources can be enormous and expensive. ColorIDs applies its years of experience working with College and University Campus Card offices in both the US and Europe to quickly and efficiently Re-Card your entire campus.

We offer...

PRE-PRINTING • Extremely high quality, digital offset, and lithographically pre-printed cards, using state of the art digital laser guided printing process.

VARIABLE PRINTING • Student's photo and identification information is completed with the highest quality dye sublimation printers. An extra laminate overlay may be applied for additional protection and extended card life.

QUALITY CONTROL • Our project manager will oversee every step of the re-card process. You will be involved at each step of the process and we will proceed only when you are completely satisfied.

HIGH CAPACITY • Using our parallel print process, we can quickly and efficiently complete your Re-card project.

CUSTOMIZED PACKAGING AND SORTING • We will package and sort your project to meet your specific distribution needs, and can even mail your students their cards.

What to expect...

AUTHENTICATE THE ELECTRONIC DATA TRANSFER • Ensuring that we can receive and read your electronic database with photos and card data.

VALIDATE DATA CHANGES • Work with you and your IT department on the changes in data or layout for your new card.

SAMPLE NEW CARD DATA • Send new card samples to your office so you can test the new formatting of the variable data.

NOTE: These first three steps are completed before we receive your order so you are 100% sure that we will be able to successfully complete your project.

PRE-PRINTED CARD ART • Send your pre-printed card art to us. We will then create a full color proof for your review and sign off.

PRINTING BASE CARD • We will print the non-variable part of your card using a high quality lithographic printing process (the pre-printed card is printed).

PROOF FINISHED CARD • We provide you with a set of real cards that have both full variable printing and the pre-printed card. You can check the encoding, printing quality and the layout. When you are satisfied with your sample cards, simply sign off them.

SHIP • We can sort the cards in any order to match your distribution plans. We will work with you to establish a process to insure that the cards can be easily distributed after arriving at your facility.
