

**ColorID's Secure Card Program is like having an extra security guard on duty.**

ColorID's Secure Card Program offers unique secure card products and concepts that enable our customers to create and design secure, ultra-durable and unique ID cards. We apply years of experience toward working with many markets to help create a 'one of a kind' ID card. The Secure Card will be unique to your organization so that counterfeiters are unable to duplicate them. With the use of the latest card product technology, such as Customized Foil Stamps, Holograms and Specialty Card Stock; ColorID can assist your organization in producing the most secure ID cards available to date.

## We offer...

**PRE-PRINTING** • High resolution plastic card pre-printing – ColorID offers extremely high quality, digital offset, lithographically pre-printed cards, using a state of the art digital laser guided printing process at a 3000 DPI resolution!

**CUSTOMIZED FOIL STAMPS** • Have your own custom foil stamp made or choose from one of ColorID's pre-made foils. They can be placed anywhere on your plastic card stock. Choose from a variety of Gold or Silver foil stocks for a card that you will be proud of and will not be counterfeited.

**HOLOGRAPHIC OVERLAMINATE PRINTING SYSTEMS** • Greatly increase the longevity and overall durability of your ID card stock with a lamination ID card printer. Choose from a clear 1 mil overlaminate or a Holographic 1 mil overlaminate to protect your cards and ensure that they cannot be duplicated.

**DURABLE COMPOSITE CARD STOCK** • Utilize ColorID's 60% PVC / 40% Polyester blend card stock for maximum card life. Our composite card stock is the most durable blend available and will decrease the risk of card breakage.

**PLASTIC CARD STOCK ASSORTMENT** • ColorID offers a wide variety of colored plastic card stock, as well as clear and color-tinted cards. Distinguish your organization from the rest of the pack with your own distinctive color.

## ColorID's secure card...

**DURABILITY** • By utilizing a durable card stock, our lithographic pre-printing or a laminating card printer from ColorID, you can ensure that your ID cards will not break or fade. This in turn will minimize the need for you to re-print and/or re-issue your ID cards.

**SECURITY** • ID card counterfeiting is a growing problem in the world today. ColorID's Secure Card program enables you to customize your ID cards and make it impossible for others to re-create and duplicate them. By adding visible authentication points to your cards, we will ensure that your cards are safe from counterfeiters.

**ORIGINALITY** • ColorID helps our customers explore their creative side by providing the tools to develop a unique, one of a kind ID card. ColorID's layout and design professionals are here to help you design the distinctive card you are searching for.

**HELP YOUR BOTTOM LINE** • ColorID's Secure Card program will help rid your organization of the problems of identity theft and ID card counterfeiting with the use of a unique, specially designed ID card from ColorID.
