- **Employee enrollment - insurance and Human Resources**

Description

The Topaz SigLite series of electronic signature capture tablets are designed to provide the benefits of electronic signatures in an controlled environment where cost is a significant issue. The SigLite is a simplified no-frills signature pad that retains the high resolution, accuracy, and data rate of the SignatureGem series of tablets but with a lower-cost touchpad interface. SigLite boasts the additional value of Topaz's powerful bundled software tools and support, including ActiveX, Java, Wintab drivers, and MS Office and Adobe Acrobat plugins for the capture, encryption, formatting, and secure processing of signatures. Topaz SigLite tablets have been used in the field and on desktops for in any number of application environments including insurance, legal, personal workflow, Internet and eCommerce. For display or imaging purposes, signatures can be saved as nonbinding image files including bmp, tif, jpg, emf, and wmf formats. Topaz SigPlus software is compliant with eSign, state and federal digital signature regulations by virtue of its ability to bind and encrypt the signature to a document or electronic form data. Examples and software plug-ins are bundled with the tablet.
