CREDENTIAL JOURNEY

PARTNERED SUCCESS

Embarking on your credentialing journey, you're met with a trifecta of excellence: best-in-class software, cutting-edge equipment, and a focus on customer satisfaction. This collaborative effort between Accredit Solutions, Zebra Technologies, and ColorID meticulously addresses every step of the path to efficient and effective credentialing. This solution encapsulates every facet of the process, ensuring optimal outcomes for customers. Let's take a closer look at each phase of this streamlined credentialing journey.

Customer-Centric Service from ColorID: At the heart of this collaboration lies a commitment to serving customers' unique needs, a hallmark of ColorID's approach. With 24 years of experience, their tailored solutions take center stage, ensuring that each organization's requirements are met with precision. This personalized service guarantees that the credentialing solution aligns perfectly with specific use cases, resulting in a process that's finely attuned to customer satisfaction.

By harmonizing the expertise of Accredit Solutions, Zebra Technologies, and ColorID, organizations can expect a comprehensive and dependable credentialing solution. Whether it's for ID badges, access control cards, or any other credentialing needs, this collaborative effort strives to deliver a superior experience and cutting-edge technology throughout the entire credentialing process.

ACCREDIT Solutions

Optimized Software by Accredit Solutions

The journey commences with Accredit Solutions' advanced credentialing and access control software, purposefully designed to simplify the entire process. This intuitive software enables effortless management, tracking, and updates for individual and group credentials. Its user-friendly interface is complemented by advanced features that enhance both security and data accuracy. This phase lays the groundwork for a smooth and organized credentialing process.

PROVEN PLATFORM

EVERY EVENT, EVERY SIZE

Actively used, trusted, and stress tested by over 20 US Major League teams and tens of US Major Events, the Accredit platform will save you time and ensure your event is more secure. Whether you need fundamental tools for registration, credential badge printing (with ColorID!), or elite requirements such as security vetting or access control integration, you're covered. You gain the ability to consolidate all information in one place, creating a single point of data entry and, critically, a single source of the truth. With this at the heart, capturing and integrating data from multiple sources ready for you to review and act upon has never been easier. You can easily see who provided the information when submitted and set the access rights individually. With elegant flexibility built in, you can continue processing individuals right up to the moment your event goes live

ACCESS CONTROL

WITH LIVE PHOTO VALIDATIONS

Accredit Access Control works seamlessly with your access control infrastructure, whether by integrating with your existing scanning or turnstile provider or our dedicated mobile app. Accessed via barcode, QR code, RFID, biometrics (including facial) or cell phone wallets, the module operates on any Android, iOS device, (including Zebra devices) or integrated dedicated scanners. In real-time, a simple interface provides details on whether an entry is permitted, and should the entry not be allowed; it will provide additional information on why to mitigate any altercations. Unlike other access control solutions, the badge holder's photo can be returned instantly on the scanning device without slowing down ingress for enhanced security. Extra to this, you benefit from live reporting and can immediately revoke access or add access privileges for credential passes that have already been issued.

Cutting-Edge Equipment from Zebra Technologies

Next, Zebra Technologies steps in with their state-of-the-art equipment, adding a layer of reliability to the journey. The Zebra ZC10L, a standout in printing technology, ensures the creation of high-quality, edge-to-edge images that stand the test of time. This dependable equipment guarantees consistent and professional output, setting the tone for a seamless credentialing experience.

Z C 1 0 L

RELIABLE DIRECT TO CARD PRINTER EXCELLENT FOR MOBILE STATIONS

The Zebra ZC10L is the only large-format, direct-to-card printer (dye sublimation printing) that can produce full, edge-to-edge color cards in one printing process. Utilizing a single printhead this unit is more similar to most PVC card printers in the industry. The ZC10L printer produces large passes and badges that are approximately 3.5" x 5.5" — making printed content and images easier to see and read. The ZC10L is so flexible that you could make card design changes right up to the time of the event. Include sponsor logos, incorporate advertising, and take guest photos at the point of entry to further personalize cards and create guest mementos.

DEPENDABLE AND FAST THERMAL WRISTBAND PRINTING

Dependable, fast and durable wristbands that consistently produce scannable barcodes. The ZD510-HC Wristband Printing solution combines the reliable ZD510-HC direct thermal printer with easy-to-load cartridges containing the only antimicrobial-coated wristbands on the market — Zebra's Z-Band® wristbands. The ZD510-HC is validated for use with leading Admission, Discharge and Transfer (ADT) systems, including Allscripts, CareFusion, Cerner, CPSI, Epic and McKesson. Also capable of printing wristbands for amusement, water-park and entertainment applications, the ZD510-HC is the industry's easiest to use and most dependable wristband printing solution.
